

# *The Adventures Of Flat Rebecca*

One day, the ANA-Ohio President, Rebecca, wished she could be everywhere at once to support nurses, advocate for policies, and inspire future leaders. A magical gust of wind blew through her office, and—POOF!—Rebecca became Flat Rebecca! Now, she could easily travel in envelopes, backpacks, and pockets to visit nurses all over Ohio and beyond.

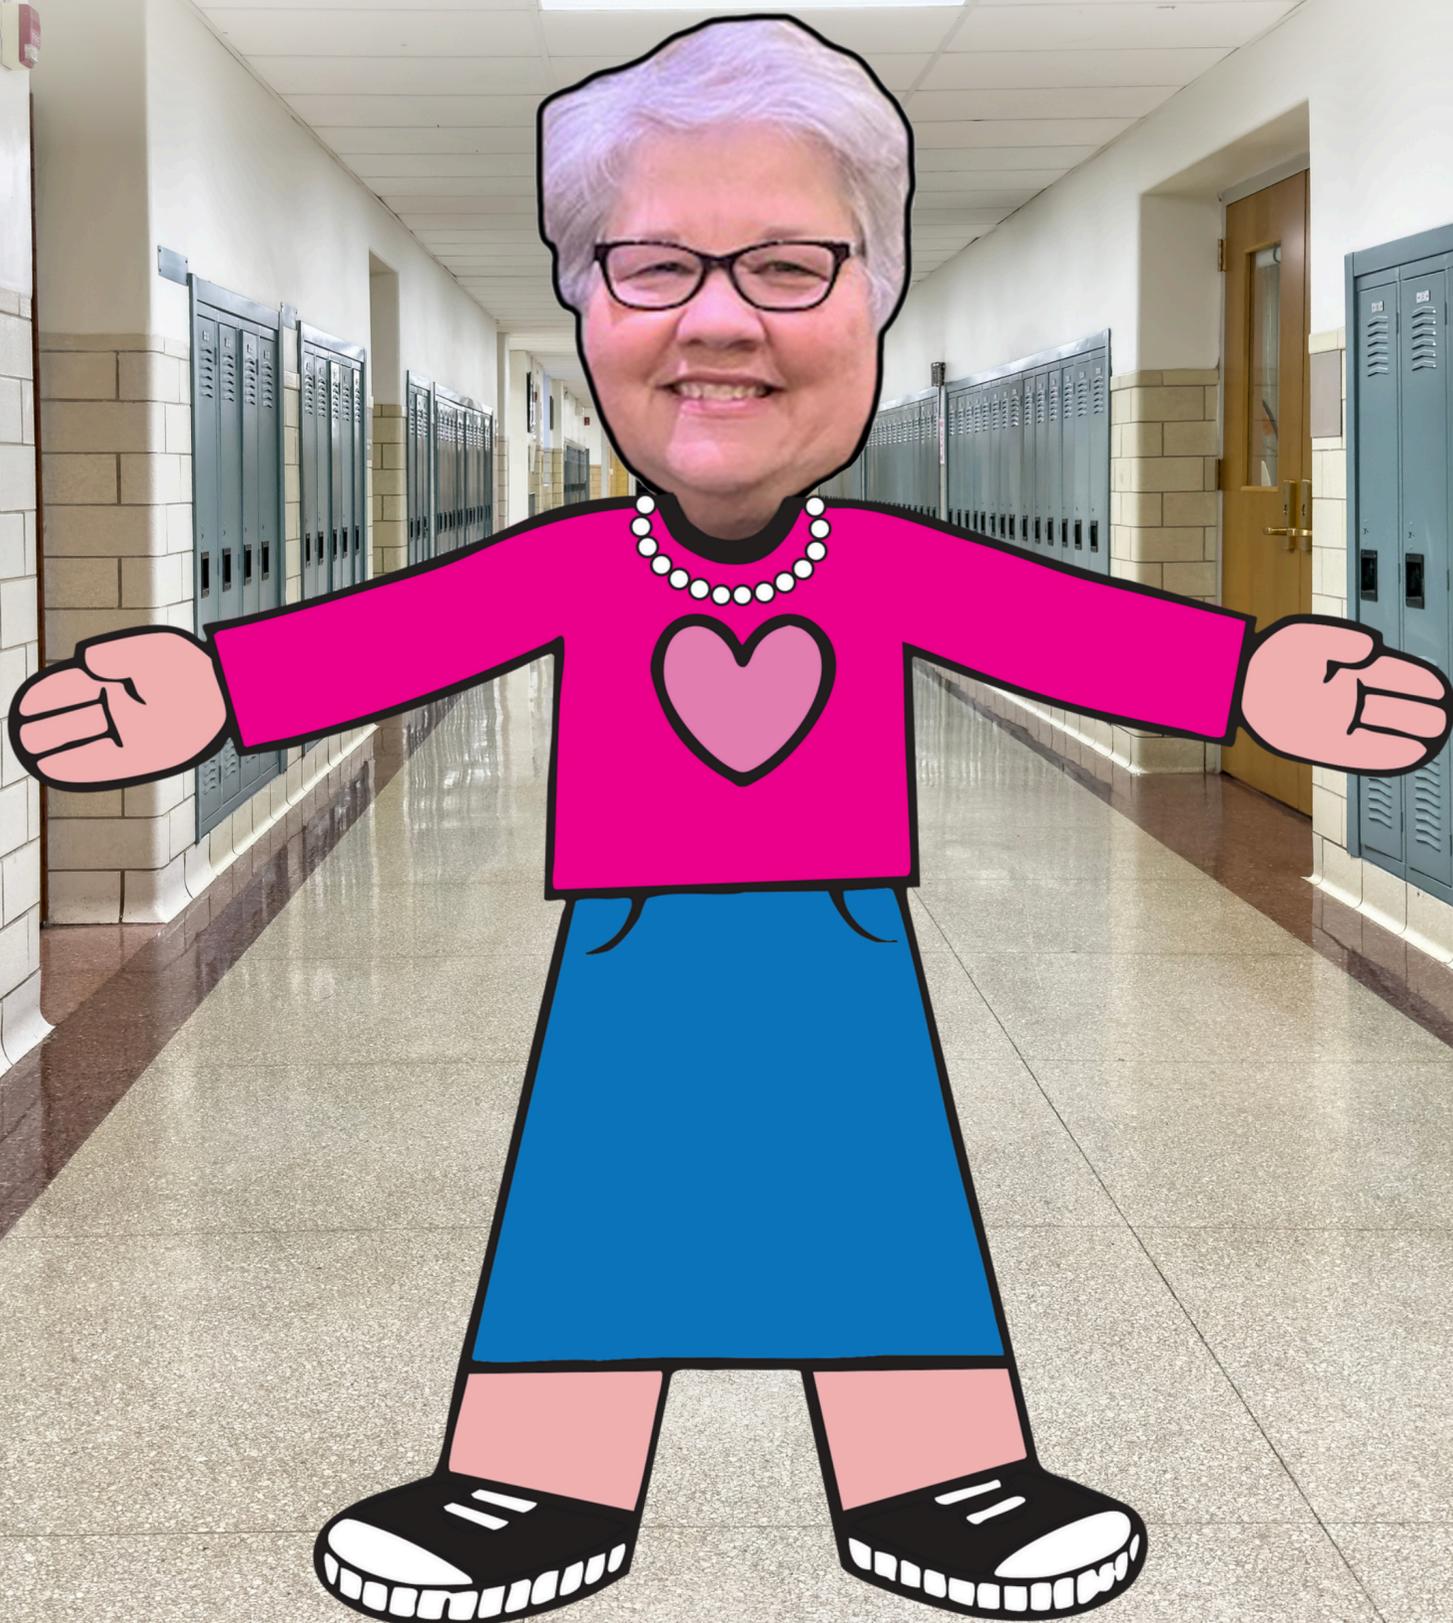

## Chapter 1: Flat Rebecca Visits the Hospital

Flat Rebecca's first stop is a busy hospital, where she meets nurses working in different departments—ICU, pediatrics, and emergency care. She listens to their challenges and reminds them how important their voices are in shaping healthcare policies within their workplace, and within the government.

## Chapter 2: A Trip to Visit Nurses Working in Communities

Flat Rebecca visits nurses working in her local school district and gives a friendly hello to the thousands of children they take care of. She reminds them of the emotional, physical, and mental health well-being they provide to students of all ages. Flat Rebecca also visits her public and environmental health nurses while she's on the go and reinforces the important work these nurses accomplish within our communities.

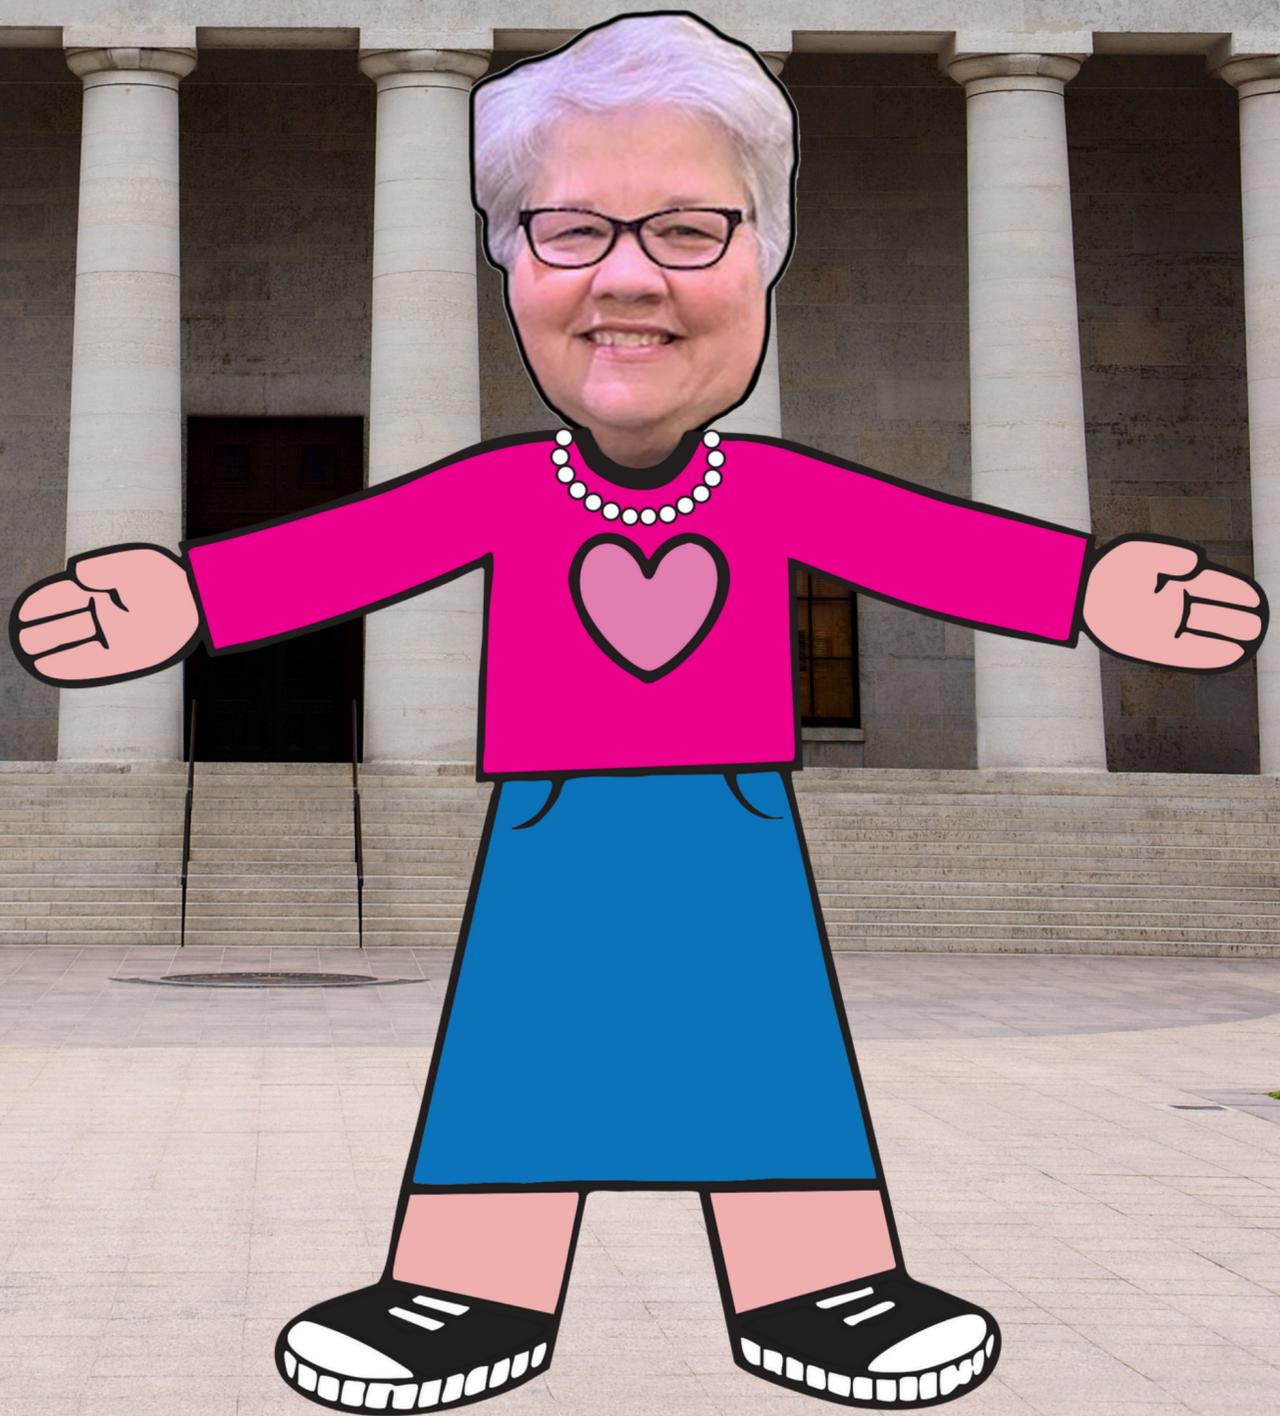

## Chapter 3: A Trip to Nursing School

Next, Flat Rebecca visits a nursing school, where she encourages students to get involved with ANA-Ohio early in their careers. She shares how advocacy starts in the classroom and inspires students to see themselves as future leaders. She also meets with the faculty at this school and reminds them that the future of the profession is in good hands with them educating the next generation.

## Chapter 4: Flat Rebecca Goes to the Statehouse

One day, Flat Rebecca gets invited to the Ohio Statehouse! She sits in on a healthcare committee meeting and helps explain why nurses' perspectives are essential in making laws that improve patient care. Lawmakers are impressed and want to hear more from nurses and Flat Rebecca encourages them to build a relationship with ANA-Ohio's graduates of the Policy Influencer Bootcamp.

## Chapter 5: The National Spotlight

After traveling all over Ohio, Flat Rebecca even gets invited to Washington, D.C., to join national nursing leaders in advocating for healthcare improvements. She proves that no matter where nurses are, they have a powerful voice in shaping the future.

Flat Rebecca's journey reminds nurses that **leadership, advocacy, and making a difference can happen anywhere.** She encourages every nurse to **stay engaged, get involved, and never underestimate their impact!**
